EXPERIENCE

Web Designer | Luminite Design

📅 03/2023 - Present 📍 Bolton | Remote

I embarked on an exciting journey with Luminite Design, where I began my career as a freelance Web Designer. Within this role, I had the opportunity to showcase my expertise in crafting captivating websites using WordPress and the powerful Divi theme. This experience not only honed my skills but also enabled me to master the art of creating impeccable, top-tier websites through the WordPress platform.

Key Responsibilities

- Be able to work efficiently in a fast-paced environment
- Design new websites on Adobe XD and build them on Wordpress.

Key Achievements

- Able to create high quality websites in an efficient amount of time depending on the website size.

Front-End Developer | Avandor

📅 11/2019 - Present 📍 Leigh

I created my own company while in university, initially I used it just to do graphic design jobs such as Logo's and Programs. When Covid hit I decided to change careers, I focused on technology and started to teach myself how to code. I subsequently completed and passed a 12 month coding course at Code Institute. For now I have disabled my website as a focus on work with Luminite Design.

Key Aims

- To create a successful company that works with small local businesses, helping them to reach a wider market through great personalised websites.
- Be able to earn some side money while learning and evolving my skills.

Key Achievements

- Been able to meet up with influential people within Leigh and Wigan Council.
- Worked with several small companies, creating new websites for them or maintaining their current one with reusable, easy to read code.

SUMMARY

Front-End Developer with a proven ability to create and maintain better code for reusability. With a passion for both personal growth and for software development. I have recently finished a Diploma in Software Development from Code Institute, having already achieved a 2:1 degree in Graphic Design. I am ready to apply my passion for coding to a talented engineering team to develop quality solutions. I'm looking to grow my career with a great company working alongside other visionary creatives, having the chance to learn and improve my skills from senior developers and have a route to progress my career within the company.

EXPERIENCE

Organiser, Web Developer, Marketing | Leigh Festival

📅 01/2022 - Present 📍 Leigh

Leigh Festival was created by my friend and I. With the aim of getting the community back together after covid. We hosted the event at Leigh RUFC, a rugby club that we both are on the committee of.

Key Responsibilities

- To create a website and marketing scheme that would inform people of the new event.
- Manage a team of volunteers during the planning stages and supervise each day of the event.

Key Achievements

- Website had over 25,000 hits, 1000 tickets sold on the website.
- We ended up making £18,000 profit, which all went back into the club.

Communications Director | Leigh RUFC

📅 01/2020 - 07/2023 📍 Leigh

At the start of 2020 I joined the board at my local rugby club. I worked within a great team, creating events and coming up with ideas that helped the club make more revenue. I decided to resign as a director to focus on my career but I will still be helping them with events such as Leigh Festival, Bonfire Night & our new Christmas Markets which starts this year!

Key Responsibilities

- Increase our outreach on social media.
- Create solutions to any issues that arise in the future.
- Create a team to manage and relay achievements and issues back to the board.

Key Achievements

- 88.6% Increase in Facebook page reach without using ads.
- Created a successful Annual Festival which produces £15,000 + Profit.
